

LABOUR LECTURES 2012

Professor Joshua D. Angrist (MIT)

***Empirical Strategies:
IV and RD go to school***

June 18-20 2012, EIEF

CEIS and the University of Rome “Tor Vergata” are pleased to announce the course on **Empirical Strategies: IV and RD go to school**, by Prof. Joshua Angrist (MIT) to be held at EIEF, via Sallustiana 62 in Rome.

Empirical Strategies: IV and RD go to school is a mixture of classroom lectures and American labor-lunch style presentations with discussion of participants’ work. **Interested researchers and advanced graduate students are encouraged to present a paper.**

This course covers econometric ideas and widely used empirical modelling strategies discussed in the book *Mostly Harmless Econometrics (MHE)* by J.D. Angrist and J.S. Pischke.

COURSE OUTLINE

- 1. Instrumental variables**
- 2. External validity**
- 3. Understanding effect heterogeneity**
- 4. Regression discontinuity: theory and application**
