

AVVISO DI SEMINARIO

Il giorno **29/04/2025** alle ore **15:00**

nell'Aula Gismondi

della Macroarea di Scienze MM.FF.NN.

Dr. Ilaria Cianchetta

Strategic Innovation Manager – Elsevier, The Netherlands

terrà un seminario dal titolo:

Research Integrity & Publishing Ethics:

A whistle-stop tour of common ethical pitfalls of well-intentioned researchers

Proponenti: Prof.ssa Silvia Orlanducci, Prof.ssa Emanuela Tamburri

ABSTRACT

In the rapidly evolving landscape of academic research, maintaining integrity and adhering to publishing ethics is crucial for fostering trust and credibility within the scientific community. This seminar aims to provide researchers with essential insights into the 10 most prevalent ethical missteps that can compromise the work of well-intended researchers.

Participants will engage in an interactive discussion highlighting common pitfalls, such as data fabrication, plagiarism, and improper authorship attribution, while gaining practical strategies to navigate these challenges effectively. Furthermore, the seminar will address the growing concern of predatory journals, elucidating the risks associated with publishing on these exploitative platforms and the potential impact on researchers' professional reputations.

To conclude, we will explore the emerging threat of paper mills, shedding light on their operations and the ethical implications of using such services. By the end of this seminar, attendees will be better equipped to uphold the highest standards of research integrity and publishing ethics, ensuring their contributions to the academic community are both legitimate and respected. Join us for this crucial session to safeguard your research endeavors and enhance your professional standing in the field.

SPEAKER BIO

Ilaria Cianchetta is a strategic innovation manager at Elsevier. She holds a BSc in Physics from the University of Rome Sapienza, a master's degree in Materials Science, and a PhD in Chemical Sciences from the University of Roma Tor Vergata. She moved to the United States in 2013 to work as a post-doctoral researcher at the Getty Museum in Los Angeles and then to Boston to start her career in publishing. In 2016 she was hired as Chem's scientific editor, handling the journal's physical and materials chemistry papers. In 2020, she relocated to the Netherlands. She was promoted to the inaugural Editor-in-Chief of *Chem Catalysis*, where she worked for four years, elevating the journal among the leading titles in the field. Since 2024, she has led Elsevier's Research Integrity and Trust innovation program.
